# MARKER / CLEARANCE LIGHTS

ECVML351(x)

## PART NUMBERS

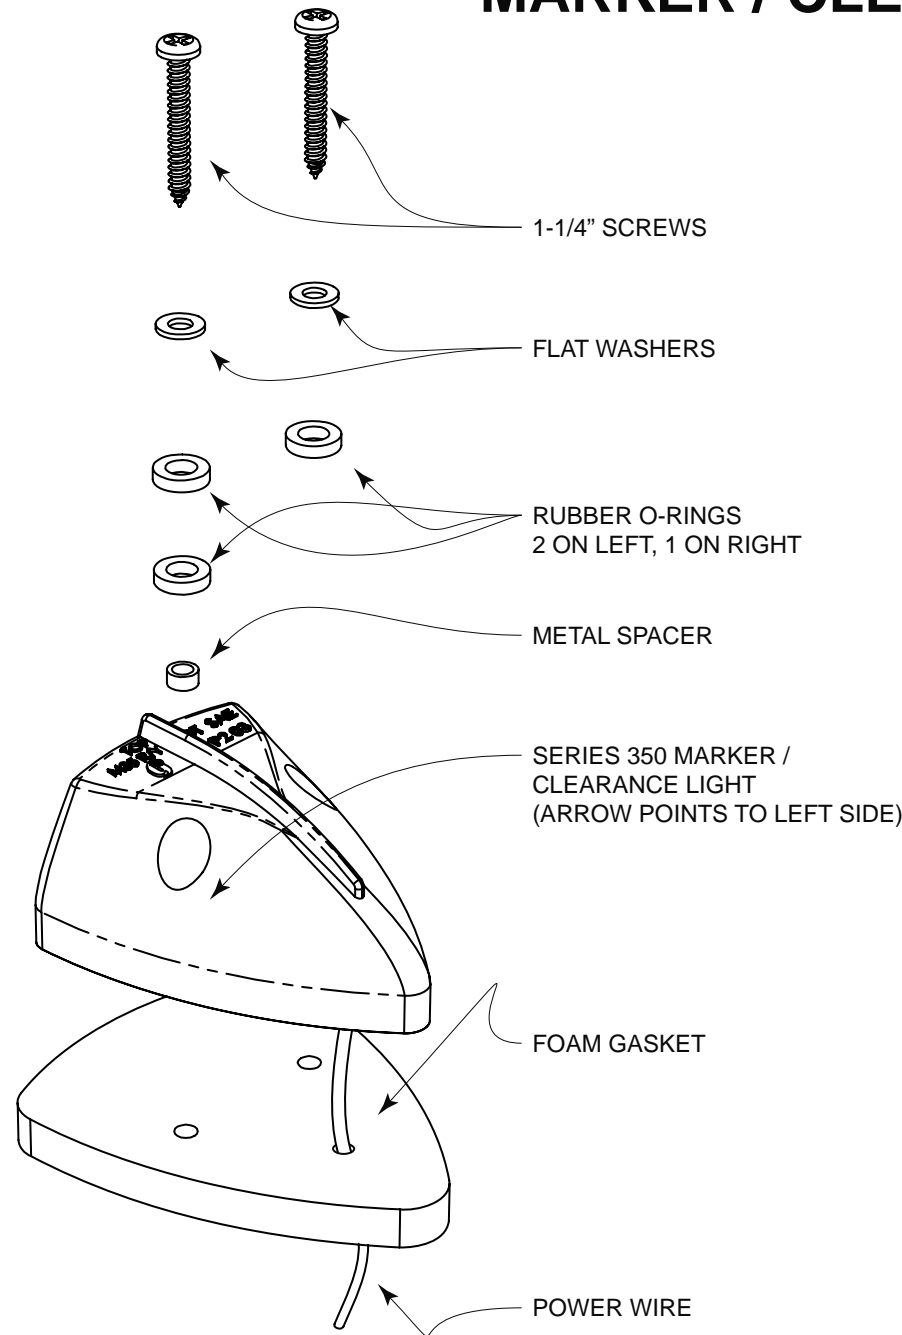

ECVML351Y - Marker, Yellow  
ECVML351R - Marker, Red

The 350 Series marker light (red or yellow) is easily installed but because the light is equipped with chassis ground (allowing for single power wire installation) these instructions must be followed closely.

## WIRING INSTRUCTIONS

GROUND (-): Internal  
RED WIRE (+): Connect to Power Source +12Vdc

1. Use light to establish screw locations and approximate location of power wire exit. Ensure there are no burrs that may chafe or cut wire.
2. Push wire through foam gasket's rear hole and make a connection to +12Vdc.
3. Install light as shown. Note that the ground side will be on the left side of the vehicle and care must be taken to install spacer, O-rings, washers and screws in the sequence shown at right.
4. **DO NOT OVERTIGHTEN SCREWS.** This may cause damage to the light or vehicle's surface.

## WARRANTY

Except for our limited warranty, available on our website at [www.soundoffsignal.com](http://www.soundoffsignal.com), a hard copy of which can be obtained from SoundOff Signal upon request, all other guarantees or warranties including the implied warranty of merchantability and the implied warranty of fitness for any particular purpose are void and of no effect, unless specifically agreed to in writing by SoundOff Signal.
