

New reinforced metal screw bosses reduce accidental overtightening during installation

New metal screw bosses prevent cracked lenses during installation due to over-tightening of screws.

Filler plugs included

The 7" Round Backup/Reverse Light ships with Filler Plugs for a finished look.

Each light features a single Gen3 ultra bright LED and a very attractive price point.

GOOD BETTER BEST
PRODUCT RATING

- New powerful, single diode 4" Round & 7" Round Backup/Reverse lights from SoundOff Signal are economically priced for bus & truck fleets.
- LED lighting offers a low amp draw, long-lasting reliability, and better performance. LED lights are designed to last the lifetime of the vehicle without ever having to change a bulb.
- Innovative lens & optics design provides a wider angle of light resulting in greater side visibility. A single Gen3 ultra bright LED powers through darkness, fog or rain easily illuminating your surroundings and alerting other motorists to your presence.
- Optional Chromed Dress Ring (#ECVR4CHRM) is available for the 4" Round light.
